

Milestone 3 Feedback Summary Report

- As a user, it is difficult to find a homepage.
 - Make the home button more obvious for the user to find.
- Login: From the usability part, make the size of the form larger, since it is hard to read.
 - Make the font size larger in the login page.
- Missing the forgot password for the login.
- Give users an option to change password.
- Creating an account: Need users to validate password when creating an account.
- Search toggle: It is hard to understand what it is trying to do. User has no way to know if they are selecting ingredient or turning it off. Remove the toggle bar.
 - Expand search bar more, there is a lot of space there.
- Profile icon: find a way to tell the user that you can create the account. It is hard for the user to find where to create.
- The image box should be bigger in the create recipe page.
- Make the font size larger for the user to read in general.
- Make an admin page where admins are able to remove the recipes.
- Casual and registered users should be able to do the same thing most of the time. The registered user will be able to have more freedom.
- Need to add the number of results from the search. Add show more button.

Overall he seemed to like our application. He just had some concerns regarding how intuitive the site was to navigate. He also has concerns about whether or not we will be able to complete all of our Priority 1 requirements. Maybe we will have to re-assess what we truly consider to be P1.
